Bi-State Regional Commission invites you to participate in a Public Workshop to help inform the future design of the IL-92 Corridor from Rock Island to Silvis.

The IL-92 Corridor Plan will provide Bi-State Regional Commission with a physical framework and action plan to improve the safety, appearance and function of the Corridor. The workshop will include:

- Existing Conditions of the Corridor
- Travel Survey to better understand how the Corridor is used
- Economic Development opportunities

Stop in at any time to participate in activities designed to generate ideas for the future of IL-92. Refreshments will be served and families are welcome. **Have your voice heard!**
